

# Contribute

NOC is developed and maintained by [community of volunteers](#). You are welcome to join community and contribute to project. You have several options of participation, depending on your willing and skills. Every contribution will be greatly appreciated.

## Criticism

All the criticism about how hard it was to find NOC, what difficulties have arisen during installation and use will help us to make a better product. Do not hesitate to grumble

## Impressions

Share your impressions with community. Your impressions are working stuff too

## Success Stories

If you successfully using NOC, take a time and write [Success Story](#). Success stories will help the market to recognize the product

## Write documentation

Help us to improve [Documentation](#) and [FAQ](#) by fixing the bugs and submitting missed articles

## Code reviews

If you have working knowledge of either Python, Django, Javascript, PostgreSQL or MongoDB, participate in our [code reviews](#). Code audit will help to make NOC's codebase better

## Write unittests

If you have ever little Python programming skills, help us to increase overall test coverage, writing and extending unittests.

## Submit canned beef

Canned beef is an universal mechanism to test [SA](#) scripts. If you can run scripts on platforms and version not yet covered, spend some time to grab canned beef and send to us for further testing

## Report the bugs

Fill bug reports for all bugs found. See [submission guide](#) for details

## Fix the bugs

Do not hesitate to fix bugs and submit a patches

## Write code

Improve existing or add completely new features and send the patches.

## Share testing environment

If you want to have NOC's unittest were run on your OS/Python/Database versions of choices, set up virtual machine and share it to our [continuous integration](#) system. We will periodically test the NOC in your environment.
