

Upgrade

Setting up

Choose which branch to follow:

- **default** - Last stable release, including hotfix releases
- **develop** - Last stable development snapshot
- **feature/<name>** - One of the feature-testing releases. See [full list](#) for details

Set up *etc/upgrade.conf*

```
BRANCH=<branch name>
```

Stopping NOC daemons

All NOC daemons must be stopped during upgrade. Stop *noc-launcher* daemon

OS	CLI Command
Linux	<code>/etc/init.d/noc-launcher stop</code>
Solaris	<code>svcadm disable noc-launcher</code>
FreeBSD	<code>/usr/local/etc/rc.d/noc stop</code>

Upgrading NOC

```
/opt/noc# ./scripts/upgrade
```

Starting NOC daemons

Start *noc-launcher* daemon to restore NOC operations

OS	CLI Command
Linux	<code>/etc/init.d/noc-launcher start</code>
Solaris	<code>svcadm enable noc-launcher</code>
FreeBSD	<code>/usr/local/etc/rc.d/noc start</code>
