

NOC 0.7(4) Released

After 2 months of development NOC 0.7(4) is finally out

Major release highlights are:

1. Custom fields
2. UI Fixes
3. SA Monitoring tools and subsystem optimizations
4. IPAM improvements
5. Network Interface Inventory's UI
6. Network topology in database
7. MRT JSON interface can use IP addresses as selector
8. VC states
9. Script bugfixes

See [RELEASE NOTES](#) for details. Follow [Downloads \(deprecated\)](#) section. Refer to [documentation](#).

NOC 0.7(4) also introduces an official [NOC Virtual Appliance](#), ready for drop-in deployment.
