

Submission Guide

If you found a bug, have patch or improvement proposal, please fill an issue in our [issue tracker](#).

Issue Trackers

[nocproject.org](#) issue trackers contains following projects:

- [NOC](#) - Issues related to NOC
- [Site](#) - nocproject.org site and services

Creating an issue

Before reporting an issue check [FAQ](#) and open issues. May be you issue was already reported before. To mark your interest in resolving an issue, vote for it. You can also subscribe to issue (watch). If you have new issue follow instructions:

Please report one problem or one proposal per issue. Do not mix unrelated problems or proposals in single issue.

To create an issue:

1. Jump to a proper tracker
2. Press "+ Create issue" button
3. Select issue type:
 - a. Bug - for bug report
 - b. Improvement - for improvement proposals
 - c. New Feature - for patches
4. Fill **summary** field. Summary must be short and informative, allowing to quickly understand a meaning of issue. Fill **summary** in english.
5. Left **priority** to *Minor*. Priority will be risen or fallen by developers later according your description
6. Select **component**
7. For bug reports, fill **affected version** with your current version. You can get it by

```
/opt/noc$ ./scripts/about | head -1  
|NOC|0.7(1)|
```

8. Left **fix versions** untouched, it will be filled by developers later
9. Left **assignee** untouched, it will be filled by developers later
10. For bug reports paste

```
/opt/noc$ ./scripts/about
```

output into **Environment** field

11. Fill **description** field. Description must be informative. Add maximum diagnostics to help support
12. Add labels. If your issue relates to particular profile, add profile name as label
13. Press "Create" button
